What will the Factions Do Next! Well, they are waiting for opportunities, and will seles the first promising one that offere. The Black Republicans have climbed down a good deal; protesting that they are not Abelitionists; and the Know-Nothings are losing their intensity Both factions are looking to a union, and are even new in concert to abuse the Democratic party The managers will set their wits to work to patch up a uei n for the next Presidential race. Kansas will be out of the way, the Territorial policy will be settled, and the crosking and shricking will be at an end. Something else must be invented or created. Perhaps the bug-Sear of equatter sovereignty may do, after the whole matter is settled-squatter sovereignty la the ab strast. The organs have been puffing and blowing at that subject for a long time; both shudder at it. They think it a very berrible thing that the people of a Territory should have their own way.

Tais is a subject on which more ponsense has been spoken and written, North and South, that any the that has been started since this was a government. Men of sense see that communities, as so mas they are organized and able to act, will have their own way in their own aff irs, and the federal government cannot control them, or will not do so if it can. California assumed the right to organize as a State giverament, regardless of the S ates or the federal government. She came with her impudent assumption, and demanded admission into the Union. Some protested that it was all wrong, and railed about squatter soverelgaty; but finally Congress accould to the demand, and admitted the State, and all the present cronkers shouled applause.

We have now a Territory in which polygam; is tolerated and sanctioned -a bateful and disgasti g institution. Every State would vote unsaimously to abolish, if they could get at it But there the Institution is. Fillmore appointed the head polygamist Governor, and, although esveral attemp s have been made to got rid of him, they have not brea successful. The whole country has been chafing under what is universally coustiered a disgrace to the age; but what is to be done? No party is wise enough to ad vice what to do. It would indeed be possible to send an army there and break up the whole con earn by force; but that is a remely nobody is realy for. Polygiany is an institution of equattor sovereigaty. It is horribly bad, but Know-Noth ingi-m has sall nothing about it; has no remedy to propose. It is generally thought that the institution may die under the universal execuation of the Union, but statesmen hesitate to employ force. In fact, it has been applied, by mob law. to a terrible extent, without effect.

We mention these instances to show that n theory of sovereignty will answer any practical purpose, when a whole community intend to have their own way. Our institutions will not bear desporism of any sort, anywhere, and it is idle to talk of a sovereign y that is to accomplish something, with no practical power to do it. When facts no, therefore, waste their ink and paper about what the people of a Territory can do if they choose, let them explain how it was that California abolished stavery without any show of authority from Congress, and how they all agreed to it: how polygumy exists in a Territory in spite of Congress, and the uniform opinium of the States how they will make the Legislature of Kansas abolish stavery or ; rotest it, if that body does no intend in do it? But fae ions can make bugbears out of abstractions as well as anything el-e and feed their victims on delusions. They wil not be nice, however, as they are not at all restrained by any sense of consistency. Perhaps they will take up quatter apvereignly as their great doctrine, and swear they were for it all the while and that it was the Democracy that were against It. Anything will do, if it will win. One thir is certain, the Black Republicans North, and the Know Nothings South are winking and Hinking at each other. They are both ufraid of foreiguers, and don't like the Pope; and they bot hate Democrats with a holy horror, for Dam crais stand between them and spels. They could be gratified with ruling if it were not for the accurred Demorrats. This common hate and con mon lave of plunier, and equatter enversigat; that the, both hate, for precisely opposite reason Will for a the buils of a union of croaking an shricking in 1860. We foretold, in the last rac long before it happened, that the factions wou try two condidates; that it was a matter of care lating. Tae experiment failed. They will a repeat i ; there will be but one next time L the Democracy be vigilant, the enemy is n asleep. If we relex at all, he will try to steel ma en upon the country, in some disguise. The are ath usual restless p liticians in this commo wealth alone, who would spill if they sat dow without a y lu uro prospect of raing America It will wake no difference to them what issu they present. They have been spiemodic again the Pope and foreigners, but they can just easily take the other side, or forget the subjealtoget or, and swear they know nothing abou it-never did. We can only aimonish our friends to be on

their goard against all the isms and factions of the day. They have been foiled, but their advocates are deeply interested and fertile in expedients for mischief. Mark these Northern B.sck Republicans, and Southern Know-Nuthings. They have a common object, and will unite to accom-

THE WAY THRY MARRY SOMETIMES IN INDI-ANA .- Our Boosier friends have a way of their owa of Indolging their passions and sentiments, eren to the sacrifice sometimes of conventionall ties. We have brazd of an instance in which a father and son married two sisters-the young man marrying first, and the father, taking a liking to his daughter in-law, sought the acquaintance of her sister, proposed, and was married to her. Thus, in addition to the natural sisterly connect in which existed, one sister was made step-mother and the other step-daughter and ésaghter-in-law to her own sister. Nothing looks so improbable to those who have in vaticied all the wonderful medicines of the day, as that sommon weed, growing in the pastures, and along of done walls. Should one every humor in the system yet it is now a fixed fact. If you have a humor it has to start. There are no its nor ands about it, suiting some cases, but not yours. He has peddled over a thousand bottles of it in the vicinity of Boston, and know, he affects of it in every case. To those who bjact to a sick haadache, one bottle will always curelt. It gives great relief in oatard and dizziness. Some who have taken it have been contive for years, and have been regulated by it. When the body is sonnd, it works quite easy, but where there is any derangement of the functions of nature, it will cause very singular feelings, but you must not be alarmed—they always disappear in from four days to sweek. There is never a had result from it—on the contrary, when that feeling is gone, you will feel yourselt ike a new person. I heard some of the most extravagant encomiums of it that ever man listened to.
